

We aren't
building people.

WE'RE GROWING BRAINS.

Parenting is *gardening*, not construction.

You don't get to choose the seed — you learn how to *help it thrive.*

**EVERY BRAIN
IS DIFFERENT**
even in the
same family

**THE RIGHT CARE
LOOKS DIFFERENT
FOR EVERY CHILD**

**REGULATION
COMES BEFORE
INSTRUCTION**

Calm first. Teach second.

**CONNECTION
IS THE SOIL
WHERE
GROWTH BEGINS**

GROWING BRAINS MEANS:

HONORING NEURODIVERSITY
Different ≠ Deficient

ADAPTING YOUR APPROACH
to the *child* in front of you

RESPECTING AUTONOMY
Guide, don't control

ASSUMING INHERENT GOODNESS
Kids want to *belong & do well*

YOU DON'T **FORCE**
A PLANT TO GROW
FASTER.

The goal isn't *sameness.*

It's *healthy development.*
